## Global Equity Class

Fund information update at 30 September 2023

### What is the fund's objective?

The objective of the Class Fund is to provide long-term capital growth.

### What does the fund invest in?

The Class Fund invests primarily in quoted global equities, which will maximise investment returns in USD.

### What possible risks are associated with this fund?

The risk rating seen below is designed to give an indication of the level of risk, measured by volatility, associated with this specific portfolio. In order to arrive at the specific risk rating of the portfolio in question, Melville Douglas measures the volatility of the fund, in the form of standard deviation, over a three year rolling period, and compares the result to internal risk parameters. Please note that these risk ratings are designed as a guide only.

#### Risk rating

Conservative	Moderately conservative	Moderate	Moderately aggressive	Aggressive
--------------	-------------------------	----------	-----------------------	------------

### What is the suggested investment period for this fund?

#### Minimum period

1 Month	6 Months	1 Year	3 Years	5 Years	7 Years
---------	----------	--------	---------	---------	---------

### Who should consider investing in this fund?

Due to the higher risk profile of equities relative to bonds and cash, the fund is only suitable for persons prepared to bear substantial losses and volatility on their invested capital. Investors should be prepared to hold the fund for a period in excess of five years. Typically, the fund would form part of a wider wealth management strategy.

### Income

**Distribution** Income available for distribution attributable to the Class Fund shall be accumulated and not distributed to Shareholders.

#### Cost ratios (annual) including VAT as at 30 September 2023

	Class B	Class C
<b>Based on period from:</b>	01/10/2020	01/10/2020
<b>Total Expense</b>	1.73%	1.03%
<b>Transaction Costs</b>	0.00%	0.00%
<b>Total Investment Charge</b>	1.73%	1.03%
<b>1 Year Total Expense</b>	1.73%	1.03%

**Total Expense (TER):** This ratio shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over the period shown and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

**Transaction Costs (TC):** This ratio shows the percentage of the value of the fund incurred as costs relating to the buying and selling of the fund's underlying assets. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER.

**Total Investment Charges (TIC):** This ratio is simply the sum of the TER and TC, showing the percentage of the value of the fund incurred as costs relating to the investment of the fund. It should be noted that performance figures account for all costs included in the TIC ratio, so you should not deduct the TIC from performance figures, the performance is already net of the TIC.

Melville Douglas Investment Management (Pty) Ltd, FSP 595, an authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act 2002, manage the investments of the fund. Since 1983 Melville Douglas has been delivering superior investment returns across a number of asset classes. As a global boutique investment management company within the Standard Bank Group, we are uniquely positioned to offer domestic and offshore investment solutions. What truly sets Melville Douglas apart is our experienced investment team and our approach to investing – driven by balance, a long-term view and a commitment to fundamental research – which informs our investment decisions across the board.

## Fund review

The fund's net asset value was driven lower by ailing equity markets as investors digested the increasing probability of higher for longer rates and the spike in yields. Strength in the oil price saw the energy sector to which we have no exposure having a strong rally to close the quarter as the only sector with a positive return. Our style worked against us for the quarter as growth stocks underperformed value. The funds weakest performers were largely concentrated to those with relatively high China exposure (LVMH, Estee Lauder and Keyence). The outlook for China deteriorated given concerns around the property market, unemployment, and fading consumer confidence. The waxing and waning of sector and regional performance is why it pays to be diversified with the fund well balanced across sectors. Our healthcare and financials names which had been underperforming were well bid in Q3 helping offset areas of weakness.

## Market overview

The prospect of higher for longer interest rates is centre stage. Longer term yields have marched higher with the US 10 year at levels not seen since September 2007. This has weighed on risk assets. We have seen a resurgence in the oil price heightening concerns around inflation. Market expectations for rate cuts have been pushed out with the Fed's dot plot resetting. Sprinkle that with a lacklustre global growth narrative ex US and the market did not have too many bright spots to focus on. Positive surprises on revenue and earnings growth over the Q2 earnings season, failed to catalyse much share price upside over the quarter. The weak macro and struggling property market in China has been another source of concern for investors.

## Looking ahead

Navigating these volatile markets, requires focus on not just our offense (deep bench of quality investment ideas) but also our defence (selling underperforming ideas). At Melville Douglas our sell discipline is a key factor in our investment management process. We have a well-defined sell discipline that helps guide our decisions.

Daniel Kahneman, founder of prospect theory said the worst time to make a decision is when you are in the midst of it. It is therefore important for us to have a plan on what would make us quit a position before we face the decision. In the heat of the moment, we tend to not behave rationally reacting to bad news by escalating our commitment or being shocked into inaction. To drive more objective behaviour our analysts identify red flags at the time of buying a stock and these are reviewed regularly. The analysts ask themselves, what factors that if they had to see them, would change the investment case, and prompt a sell decision. This allows us to react to changed circumstances and keeps us from being paralysed with uncertainty. Having a monitored list (a list of successfully screened companies that are subject to our in-depth analysis and meet our quality business criteria) means we have a deep bench of options to choose from which aids the decision to sell.
