

Melville Douglas STANLIB Bond Fund

Fund information update at 31 May 2026

What is the fund's objective?

The objective of the fund is to achieve capital preservation and income generation by investing in long-term fixed interest securities. This fund is an actively managed, unconstrained, South African fixed-income strategy that aims to generate consistent and predictable long term returns through investments in high quality income-yielding debt securities.

What does the fund invest in?

Securities will normally consist of a spread of gilts, semi-gilts, loan stock, debentures, debenture bonds, approved securities, notes and liquid assets and any other securities which are consistent with the fund's investment policy.

What possible risks are associated with this fund?

General market risks include a rise or volatility in bond yields, rising interest rates, economic and political risk, inflation uncertainty and duration risk. Where foreign securities are included in the portfolio there may be additional risks, such as potential constraints on liquidity and the repatriation of funds, macro-economic risks, political risks, tax risks, settlement risks, and potential limitations on the availability of market information.

Risk rating

Conservative	Moderately conservative	Moderate	Moderately aggressive	Aggressive
--------------	-------------------------	----------	-----------------------	------------

What is the suggested investment period for this fund?

Minimum period

1 Month	6 Months	1 Year	3 Years	5 Years	7 Years
---------	----------	--------	---------	---------	---------

Who should consider investing in this fund?

This fund suits investors that are looking for stable income and reasonable capital growth over the longer term.

Income

Distribution Net income is calculated and accrued daily and is declared and distributed quarterly.

Declaration 31 March, 30 June, 30 September, 31 December

General fund information

Manager(s) Mzimasi Mabece, Paolo Senatore and Bernard Drotschie
Size (NAV) R 3.04 billion
Peer group ASISA South African - Interest Bearing - Var Term
Benchmark FTSE/JSE All Bond Index

Regulation 28 Complies

Regulation 28 of the Pension Funds Act sets the limits in terms of the maximum exposure the retirement fund and the individual retirement fund member's savings (i.e. your savings) may have to various asset classes. For more information please refer to the Regulation 28 Guidelines available on our website (www.stanlib.com). This Fund complies with this Regulation.

Class A

Launch 01 July 2014

ISIN number ZAE000191763

JSE code MDBFA

Minimum investment requirements -

Lump sum R 50,000

Monthly R 1,000

What are the costs to invest in this fund?

Maximum charges including VAT

	Class A
Initial fee (manager)	0.000%
Initial fee (adviser)	3.450%
Annual fee (manager)	0.863%
Annual fee (adviser)	0.000%
Performance fee	N/A

Annual fee (manager) – this is a service charge (% based) applicable to each class of a fund, that is levied on the value of your portfolio and includes the **Annual fee (adviser)** fee (where applicable). Annual fees are calculated and accrued daily and recovered monthly from the income awaiting distribution in the fund.

Cost ratios (annual) including VAT as at 31 March 2026

	Class A
Based on period from:	01/04/2023
Total Expense	0.87%
Performance Fee	0.00%
Transaction Costs	0.00%
Total Investment Charge	0.87%
1 Year Total Expense	0.88%

Total Expense (TER): This ratio shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over the period shown and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

Transaction Costs (TC): This ratio shows the percentage of the value of the fund incurred as costs relating to the buying and selling of the fund's underlying assets. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER.

Total Investment Charges (TIC): This ratio is simply the sum of the TER and TC, showing the percentage of the value of the fund incurred as costs relating to the investment of the fund. It should be noted that performance figures account for all costs included in the TIC ratio, so you should not deduct the TIC from performance figures, the performance is already net of the TIC.

Melville Douglas STANLIB Bond Fund

Quarterly update at 31 March 2026

Who are the investment managers?

Since 1983 Melville Douglas has been delivering superior investment returns across a number of asset classes. As a global boutique investment management company within the Standard Bank Group, we are uniquely positioned to offer domestic and offshore investment solutions. What truly sets Melville Douglas apart is our experienced investment team and our approach to investing – driven by balance, a long-term view and a commitment to fundamental research – which informs our investment decisions across the board.

Mzimasi Mabece
BSc
Head of Fixed Income: South Africa

Mzimasi has more than 14 years financial market experience spanning both quantitative analysis as well as portfolio management and has managed both fixed income and equity funds. Prior to joining Melville Douglas, he was Head of Fixed Income at Mvunonala Asset Managers. He previously held Portfolio Manager roles at Prowess Investment Managers and Old Mutual Investment Group (OMIGSA) and also worked at Sanlam Investments as a fixed income Quantitative Analyst. Mzimasi holds a BSc degree.

Paolo Senatore
MSc (Mechanical Engineering)
Strategist

Paolo joined Melville Douglas in 2018 as a strategist and co-manages the Melville Douglas STANLIB High Alpha Fund. From 1995 he was with the FirstRand Group, gaining over 20 years' financial market experience. In 2000, he became CIO of RMB Private Bank Portfolio Management with the responsibility of growing the specialised institutional business. He was CIO for Ashburton Investments, FirstRand's asset management initiative, from its inception, and was instrumental in consolidating asset management businesses and investment processes. He holds an MSc (Mechanical Engineering).

Bernard Drotschie
BCom (Hons), CFA®, CFPTM
Chief Investment Officer

Bernard joined Melville Douglas in 2002 as a portfolio manager and analyst, prior to which he worked for Absa Asset Management. He is the lead manager on the Melville Douglas Global Growth Fund (USD) and co-manages the Melville Douglas Balanced Fund (USD) and the Melville Douglas Income Funds. He holds a BCom (Hons) degree in Econometrics, is a CFA® Charterholder and a Certified Financial Planner™ professional.

Fund review

The fund came under pressure in the first quarter of the year, roiled by heightened military conflict in the Persian Gulf region. For the period the fund performed slightly behind its peers and the benchmark. However, on a 12-month basis the fund is still ahead of its peers and inline with its benchmark.

This performance is due to our prudent management of the fund where we do not take excessive bets against the benchmark.

Market overview

Characterising the first quarter of 2026 as merely eventful fails to capture the true nature of the period. The quarter was defined by sharp volatility and heightened risk, with most risk events materialising in the final month. This late turbulence contrasted markedly with an encouraging start, as markets entered the year positioned to build on the constructive momentum carried over from 2025.

South Africa entered 2026 with a continuation of gradual macroeconomic improvements, though without yet reaching a clear inflection point. Load shedding had largely receded, providing a stabilising boost to business confidence, while reforms at Transnet progressed slowly but in a constructive direction. The inflation target had been lowered, and the inflation outlook characterised as benign, creating room for the South African Reserve Bank to ease policy further. GDP growth expectations remained modest, in the low-to-mid 1% range, but the tail risk of outright stagnation had diminished. Inflation surprised slightly to the upside early in the quarter, driven mainly by fuel and food dynamics, which kept the SARB cautious. However, underlying inflation pressures remained contained and expectations well anchored, reinforcing confidence that the monetary easing cycle is firmly entrenched and that further rate cuts are largely a question of timing. This constructive policy and macro backdrop allowed the Minister of Finance to deliver a deliberately "boring" budget in February, anchored in fiscal stabilisation and an ongoing commitment to debt consolidation.

At its January meeting, the South African Reserve Bank's Monetary Policy Committee (MPC) kept the repo rate unchanged at 6.75% following a split vote. The divided outcome, together with the more dovish tone of the post-meeting communication, reinforced expectations of a rate cut in March. Against this constructive backdrop, domestic assets and the rand were well supported and traded on the front foot. By the final trading day of February, the rand had strengthened to below ZAR16 per US dollar (R15.94/\$), representing a year-to-date appreciation of 3.80%. Over the preceding 12 months, the domestic bond market had delivered equity-like returns of 28.18%, and while momentum was expected to moderate, the bull market appeared set to continue, albeit, at a less aggressive pace.

Events took a sharply adverse turn on Saturday, 28 February 2026, when global markets awoke to news of a joint US and Israeli strike on Iran that resulted in the death of its Supreme Leader, Ayatollah Ali Khamenei. This geopolitical shock triggered a broad and indiscriminate market sell-off, with no asset class spared. In March, oil prices surged by 63.28%, rising from \$72.48 per barrel to \$118.15 per barrel, intensifying global recession fears and reigniting inflation concerns. Against this backdrop, global central banks, including the South African Reserve Bank, were compelled to reassess their growth and inflation outlooks at their March policy meetings. As renewed price pressures came to the fore, most central banks, SARB included, opted to keep policy rates unchanged, citing heightened uncertainty and the resurgence of inflationary risks.

Looking ahead

Global interest-rate markets have repriced materially, with implied policy expectations now signalling an upward bias as the next likely move. Locally, the FRA curve is pricing in a cumulative 50-basis-point rate hike over the next 12 months. This is not our base case. We expect the South African Reserve Bank to err on the side of caution and keep policy rates unchanged while geopolitical uncertainty remains elevated and the outlook continues to evolve. During this period of heightened uncertainty, we expect the rand to remain volatile and vulnerable. Sustained currency weakness could erode recent disinflation gains and delay further monetary easing, particularly against the backdrop of lingering fiscal slippage risks, thereby posing a potential threat to the medium-term debt-consolidation trajectory.

The commentary gives the views of the portfolio manager at the time of writing. Any forecasts or commentary included in this document are not guaranteed to occur.

Change in allocation of the fund over the quarter

Asset type	Q1 2026	Q4 2025	Change
Domestic Cash	1.70	1.75	-0.05
Domestic Fixed Interest Govt	98.30	98.25	0.05

The portfolio adhered to its portfolio objective over the quarter.

Important information update at 31 May 2026

Disclosures

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

The Melville Douglas STANLIB Bond Fund is a portfolio of the STANLIB Collective Investment Scheme (the Scheme).

The manager of the Scheme is STANLIB Collective Investments (RF) (Pty) Limited (the Manager). The Manager is authorised in terms of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) to administer Collective Investment Schemes (CIS) in Securities. Liberty is a full member of the Association for Savings and Investments of South Africa (ASISA). The Manager is a member of the Liberty Group of Companies. The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of a CIS portfolio. A schedule of fees and charges and maximum commissions is available on request from the Manager.

The trustee of the Scheme is Standard Chartered Bank.

The investments of this portfolio are managed, on behalf of the Manager, by Melville Douglas Investment Management (Pty) Ltd, an authorised financial services provider (FSP), FSP No. 595, under the Financial Advisory and Intermediary Services Act (FAIS), Act No. 37 of 2002.

Prices are calculated and published on each working day, these prices are available on the Manager's website (www.stanlib.com) and in South African printed news media. This portfolio is valued at 15h00. Forward pricing is used. Investments and repurchases will receive the price of the same day if received prior to 15h00.

This portfolio is permitted to invest in foreign securities. Should the portfolio include any foreign securities these could expose the portfolio to any of the following risks: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

This is a portfolio that derives its income primarily from interest-bearing instruments. The yield (if shown) is a current effective yield calculated daily.

This portfolio is a third party named, co-named portfolio. The Manager retains full legal responsibility for this portfolio. A third party named, co-named portfolio is a portfolio bearing the name of both the Manager and the financial services provider (FSP) where the FSP, under an agreement with the Manager, undertakes financial services of a discretionary nature, as contemplated in the Financial Advisory and Intermediary Services Act, Act No. 37 of 2002 (FAIS), in relation to the assets of the portfolio. Melville Douglas Investment Management (Pty) Ltd, an authorised FSP, FSP No. 595, FAIS, is the third party manager of this portfolio.

The FSP is a related party to the Manager, the FSP may earn additional fees other than those charged by the Manager. It is the responsibility of the FSP to disclose additional fees to the investor. This document is not advice, as defined under FAIS. Please be advised that there may be representatives acting under supervision.

All performance returns and ranking figures quoted are shown in ZAR and are based on data sourced from Morningstar or Statpro and are as at 31 May 2026.

Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager.

Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

Statistics - Positive Months: the number of individual 1 month periods during the specified time period where the return was not negative; Max Gain: the maximum gain in a trough-to-peak incline before a new trough is attained, quoted as the percentage between the trough and the peak. It is an indicator of upside risk over a specified time period (quoted for all periods of 1 year or longer); Max Drawdown: the maximum loss in a peak-to-trough decline before a new peak is attained, quoted as the percentage between the peak and the trough. It is an indicator of downside risk over a specified time period (quoted for periods of 1 year or longer, where no value is shown no loss was experienced); Highest and Lowest: the highest and the lowest 1 year return (%) that occurred during the specified time period (quoted for all relevant classes launched 1 year or more prior to current month end date).

Additional information about this product including, but not limited to, brochures, application forms and annual or quarterly reports, can be obtained free of charge, from the Manager and from the Manager's website (www.stanlib.com).
